Subject: Varsity Project

411 Lofts has less units and more parking. Still many residents are without parking. While many do not use their cars on a regular basis, they still have them and need a place for those to reside. Currently the lot designated for the Varsity project has 86 parking spaces of which 30 are rented by 411 Loft residents. The current project is designed for 76 spaces an obvious net loss of ten spots. Now one must wonder where those 30 cars from 411 are going as well as the comparable overflow from the Varsity residents.

Thus far many have been spilling into the neighboring lots where we have impounded more vehicles this fall than in the prior ten years put together.
