

**Community Survey**  
Public Art at 219 W. Kingsley, rain garden

**To select an artist for the public art project, the city will release a request for artists to submit their qualifications for consideration. The input from this survey will assist in creating the project criteria that will be included in that request to artists. The artist selection will be based on how well their qualifications match the project criteria.**

1. A goal for this project is to integrate the public art with the rain garden. The two different systems, the rain garden and public art, will be developed to factor in the needs of the other and work together. This goal doesn't prescribe a particular art medium or use of a particular material. What would be the benefits of public art as a part of an integrated design and are there any concerns about this approach?

2. What project criteria are the most important for the artist to understand?

3. What opportunities do the site and this project offer?

Would you like to be considered for a Project Development Task Force in the future? If so, please fill out your contact information:
