Hate crime incidents are identified on the motivation of the offender(s). Law enforcement investigations determine the objective facts to lead to a reasonable conclusion that the offender's actions were motivated by bias against a racial, religious, ethnic/national origin, mental/physical disability, or sexual-orientation group. Accurate data collection of hate crimes depends heavily on proper training of law enforcement to recognize such incidents and the cooperation and desire of communities/victims to report these incidents to law enforcement.

**Victims by Type**

A total of 914 victims of hate crimes were reported to the UCR unit in 2007. Individuals and police officers made up 749 of those totals.

According to the statistics, you are more likely to become a victim of a hate crime if you are between the age 10 and 19. Anti-black was the most targeted bias for all the age groups.
